Heating and cooling radiant systems

Thanks to its great and long experience in thermohydraulic sector and to its constant attention towards all new technical solutions, RDZ is an Italian company leading in planning and realization of heating and cooling radiant systems.

SERVICES

A wide range of solutions, qualified technical advice, pre and after-sales support, prompt and fast deliveries, successful support in the installation and assembly of systems, make **RDZ** your best partner.

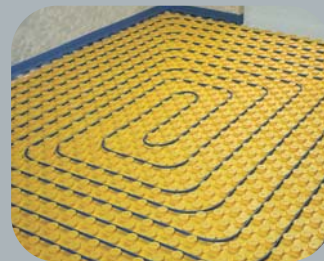

When you choose **RDZ**, you can count on a strict control of components, on a functional management of products, on a targeted technical training, on high quality materials, on a technical and commercial staff able to offer each customer a complete service in all situations at any time.

RDZ: the comfort professionals' partner

PRODUCTS

Throughout its activity **RDZ** works in order to plan and realize systems which improve comfort and wellbeing of people in all home and working environments. Using innovative radiant technology, the company offers a wide range of heating and cooling radiant systems, ideal to grant the best sensation of comfort in all seasons, specific per each kind of need, easy to install.

RDZ thermoregulation systems make it possible to adapt the system performance to effective needs and variations of climatic conditions, ensuring constant control of comfort parameters and reducing energy consumption.

We invite you to discover **RDZ** solutions, visiting our Web Site www.rdz.it or consulting our new dvd with our company profile.
